

PicLens by cooliris

immersive views across the web.

Take your favorite sites full-screen.

Think beyond the browser

PicLens instantly transforms your browser into a full-screen slideshow experience. With just one click, PicLens makes photos come to life via a cinematic presentation that goes beyond the confines of the traditional browser window. With PicLens, browsing and viewing images on the web will never be the same again.

Immerse Yourself.

Why mundanely flip through online photo galleries or squint at thumbnails from Google Image Search when you can sit back and get an immersive, full-screen experience instead? Come on and let yourself "be transported to a wonderful and magical world." (Review by *Lifehacker*)

Free of adware, spyware, and worries.

PicLens is free to download, free to use, and does not contain any adware or spyware.

Get into your favorite sites.

From Flickr to Google Images, and even Facebook and Friendster, PicLens works with a growing number of your favorite websites. Also works with PicLens-enabled Media RSS feeds on your own website ([details](#)).

Don't just take our word for it . . .

PicLens has been picking rave reviews since its release. MacWorld calls PicLens "gorgeous . . . a great idea" Lifehacker exclaims "you'll be transported to a wonderful and magical world". Techcrunch asserts "visually the results are stunning."

Choose your flavor: Firefox, IE, or Safari

| PicLens Features | Firefox | IE | Safari |
|--|---------|----|--------|
| Enjoy photos in full-screen mode | ✓ | ✓ | ✓ |
| New! Quickly drag, click, and zoom in a "3D Wall" interface | ✓ | ✓ | ✓ |
